How would an intern spend their time with you? Specifically, what projects and tasks would they complete? *Please note: your answer to this question will be provided to student applicants to give them a sense of what they would be doing for the summer if placed with you. Please limit to 500 words.*

Some students may be expected to complete research projects for their schools as part of their internship. Do you have any project ideas and could you accommodate a student working on a research project in addition to the above mentioned tasks?

Beyond offsetting your workload, how do you see an intern benefiting your organization?

What trainings would you like to see included in the first week of the program? MCHT will consider these requests and include as many as possible but please be aware that may not be able to accommodate every request.

Would you be willing/able to lead any training sessions during training week? If so, which ones?

Who at your organization would be the intern's supervisor?

Could you provide housing for the student if they required it?

In the event of pandemic-like complications, how would you still be able to provide a meaningful experience and a safe environment for the intern?

Can you think of anything specific that we could do to support you as a host?
